axo

axo likes to surprise.

Its biggest advantage – **mobility**  
– cannot be overestimated.

**Jens Korte** has designed  
chairs exceptionally easy  
to store, move, link or fit  
into any space.

axo comes in such a variety  
of models and functions  
that any conference room can be  
arranged in no time – a chair  
as easy to organise as it is to sit on.

no task  
is too difficult  
**these chairs**

the elastic plywood elements ensure comfortable sitting and durability, even over extended periods of use

the soft upholstered padding gives that extra feel of comfort

the characteristic bent line additionally adds to the chair's flexibility

mobility

invites success

Stacking up to 10 pieces the chair may be stored in high, vertical stacks to ensure an economy of storage space. Profiled glides and special fenders are in place to protect the chair frame, seat and back from damage in storage.

A variety of finishes:

- > wooden seat and back
- > upholstered seat, wooden back
- > upholstered seat and back

The back and seat are made of thick, flexible plywood, exceptionally resistant to damage.

Chairs with a desktop, available in left-handed and right-handed models. The desk top frame is made out of metal, which makes it particularly resistant to damage, especially when used frequently. The desk top is stable and made of damage resistant plywood.

Special click mechanism for secure arrangement of the chairs in rows. Each chair and row can be numbered.

**Benches** ideal for waiting rooms.

Variety of models:

A choice of two sizes of benches  
 – two and three seaters.

Three types of finishing:

- > wooden seat and back
- > upholstered seat, wooden back
- > upholstered seat and back.

The offer includes complementary tables.  
**Construction** – the exceptionally strong metal frame guarantees durability even in demanding conditions of use.

**Stacking up to 6 pieces**

– the tables may be stored in high, vertical stacks to ensure an economic use of storage space.

**Safety fenders** to secure desktops from damage while stacked up.

A **cart** for table transportation.

The tables can be instantly **linked in rows**.
