staccato

the **ingeniou** staccato will transform a banqueting hall into a lecture room or a conference hall into a training centre in no time.

You will find it difficult to find a chair more useful, more easily linked and arranged or storable in a small space. The interesting contour of the chair, inspired

by modern trends in architecture, is a product of the **Ito Design** studio founded by armin sander.

the modern shape is always, however, at the service of functionality.

I **know** what to do  
in every situation

chairs linked in rows  
have two arms on each side  
which ensures comfort to  
people sitting side by side

special linking device for  
joining the chairs into rows  
of any length, the immediate  
arrangement of a lecture hall  
is possible in no time

the very definition  
of **ingenuity**

Variety of finishes:

- › wooden seat and back
- › upholstered seat and wooden back
- › upholstered seat and back

**Back and seat**  
made out of elastic plywood,  
exceptionally resistant  
to deformation.

Organise into rows with the special  
**linking device**. Chair with arms on  
both sides may be linked. The chairs  
and the rows may be **numbered**.

**Stacking up to 10 pieces**  
– the chairs might be arranged  
in high, vertical stacks to ensure  
economic use of storage space.  
Chairs **with arms** may be stored  
in the same way.

**Folding seat** option allows for comfortable  
passage between rows or simply space saving.

**Folding arms** of durable structure made out of  
resilient steel fitted with plastic pads, highly  
damage-resistant.

**Cart** for transport of  
stacked up chairs.
